

Strategic Plan 2025 -2029

Vision – To be an active partner in waterway management, improving waterway resilience and protection.

Mission – To restore natural flooding resilience to rivers, waterways, and their catchments in the Whitsunday Local Government Area.

Government’s objectives for the community: Conserving our pristine environment that draws visitors from across the world and improving water security.

Goals (Objects - River Improvement Trust Act)	Objectives	Outcomes	Performance Indicators
Planning for and implementing measures that improve the protection, health and resilience of rivers and their catchments	Improve partnerships with government, community and non-profit organisations with shared goals	supported community partners, promoted research and collaborative projects	Trust is an active part of planning and research activities in the LGA Trust is an active member of NQ Dry Tropics
Repairing, and preventing damage to, rivers and their catchments	Actively work to identify erosion and flood damage to waterways and contribute to repair and prevention	assessment and prioritisation of erosion and damage. Repair using best practice management tools that include both geomorphic and ecological rehabilitation principles	Actively contributing to river recovery in flood-affected areas through annual works program Minimal damage to properties during an event.
Restoring natural resilience to flooding and cyclones in rivers and their catchments	Improving riparian health and floodplain management	Improved weed management in LGA. Promote the use of river restoration guidelines.	Actively contributing to improved riparian health and floodplain management through annual works program
Protection of water security	Support research and policy that promotes water security	Understand challenges and threats to water security.	No decline in water security
Improving water quality and river system function in rivers and their catchments	Improved ecological function through improved water quality and ecosystem function.	Understand water quality ecosystem function threats and challenges to prioritise improvement actions	Long term water quality improvements through sediment reduction Improved geomorphic condition in repaired reaches
Stakeholders – Whitsunday Regional Council, Catchment Groups – NQ Dry Tropics
